Candidate number

INSTRUCTIONS

- Use black ink.
- Complete the boxes above with your name, centre number and candidate number.
- Answer **all** the questions in Sections A and B.
- Write your answer to each question in the space provided.
- Additional paper may be used if necessary, but you must clearly show your candidate number, centre number and question number(s).
- Do **not** write in the bar codes.

INFORMATION

- The total mark for this paper is **70**.
- The marks for each question are shown in brackets [].
- Quality of extended response will be assessed in this paper in questions marked with an asterisk [*].
- This document consists of **20** pages.

Section A: Television

Answer **all** the questions.

INSTRUCTIONS TO CANDIDATES

- This extract relates to Questions 1–3. You have **three minutes** to read these questions before the extract begins
- The extract is approximately **three minutes** long and will be played **four** times
- **First screening:** watch the extract, you may make notes
- **Second screening:** watch the extract and make notes
- There will be a **five minute** break for you to make notes
- **Third screening:** watch the extract and make notes
- There will be another **five minute** break to make notes
- **Final screening:** watch the extract and make notes
- You will have **five minutes** to complete your notes.

You are advised to use the full 30 minutes to watch the extracts and make notes before starting to answer the questions.

The extract is from the television crime drama **Cuffs** (Episode 1, BBC One, 2015).

SAMPLE MARK SCHEME

Duration: 1 hour 45 minutes (including 30 minutes viewing time)

MAXIMUM MARK 70

This document consists of 24 pages

SUBJECT–SPECIFIC MARKING INSTRUCTIONS

Marking instructions:

MARKING

1. Mark strictly to the mark scheme.
2. Marks awarded must relate directly to the marking criteria.
3. **Crossed Out Responses**
Where a candidate has crossed out a response and provided a clear alternative then the crossed out response is not marked. Where no alternative response has been provided, examiners may give candidates the benefit of the doubt and mark the crossed out response where legible.

Contradictory Responses

When a candidate provides contradictory responses, then no mark should be awarded, even if one of the answers is correct.

Set media products

Where a response does not refer to the media products specified in the question, no marks can be awarded.

Short Answer Questions (requiring only a list by way of a response, usually worth only one mark per response)

Where candidates are required to provide a set number of short answer responses then only the set number of responses should be marked. The response space should be marked from left to right on each line and then line by line until the required number of responses have been considered. The remaining responses should not then be marked. Examiners will have to apply judgement as to whether a 'second response' on a line is a development of the 'first response', rather than a separate, discrete response. (The underlying assumption is that the candidate is attempting to hedge their bets and therefore getting undue benefit rather than engaging with the question and giving the most relevant/correct responses.)

Short Answer Questions (requiring a more developed response, worth two or more marks)

If the candidates are required to provide a description of, say, three items or factors and four items or factors are provided, then mark on a similar basis – that is downwards (as it is unlikely in this situation that a candidate will provide more than one response in each section of the response space.)

Longer Answer Questions (requiring a developed response)

Where candidates have provided two (or more) responses to a medium or high tariff question which only required a single (developed) response and not crossed out the first response, then only the first response should be marked. Examiners will need to apply professional judgement as to whether the second (or a subsequent) response is a 'new start' or simply a poorly expressed continuation of the first response.

4. For answers marked by levels of response:
 These are marked according to a best fit approach.
- a. **To determine the level** – start at the highest level and work down until you reach the level that matches the answer
 - b. **To determine the mark within the level**, consider the following:

Descriptor	Award mark
Just enough achievement on balance for this level	At bottom of level
Meets the criteria but with some slight inconsistency	Around the middle of the level, depending on how much inconsistency is seen.
Consistently meets the criteria for this level	At top of level

Note: bulleted descriptors describe the non-bulleted descriptor directly above the bulleted list/bulleted phrase.

Note: in questions where there are two levels grids, a separate mark should be given for each grid. Individual grids are marked against different Assessment Objectives, which are noted at the top of the grid.

Section A – Television Candidates watch an extract from *Cuffs* which is approximately three minutes in length. The extract starts at 0:27:53 (after 'I've been bled on, spat on and felt up') and ends at 0:30:56 (after '60 miles per hour and climbing').

1 Analyse how sound is used in the extract to create meaning. Refer to at least **two** examples from the extract in your answer.

Assessment Objectives	AO2 - Analyse media products using the theoretical framework of media. (Elements tested in this question: AO2(1a) Analyse media products using the theoretical framework of media.) Maximum 5 marks	
Additional Guidance	The 'indicative content' is an example of valid content. Any other valid content is acceptable and should be credited in line with the levels of response. The 'indicative content' shown is not a full exemplar answer. It is not expected for candidates to cover all elements of the indicative content.	
Indicative content All responses except the most descriptive should show some ability to undertake semiotic analysis, but do not need to use the terms such as 'semiotics', 'denotation' or 'connotation' to demonstrate this. Responses should analyse aspects of the soundtrack such as: <ul style="list-style-type: none"> • the use of background sound, e.g. the chatter of other diners and diegetic music in the background of the scene in the dining room connotes the calm, relaxing, normality of the situation • the use of incidental music in the extract, e.g. the rhythmic non-diegetic music during the robbery and car chase carrying connotations such as danger, excitement, and urgency • the use of sound effects, e.g. the sound effect of the vehicle smashing the glass in the shop window connoting the violence of the action, the sound effect of the police siren during the car chase connoting the urgency of the chase • the use of off-screen speech, e.g. the compressed sound of the PCSO's call for assistance creates contrasting connotations of emergency to those of the canteen scene • any other relevant analysis. 	5 AO2 5xAO2(1a)	Use Levels of Response criteria Level 3 (4–5 marks) <ul style="list-style-type: none"> • An excellent analysis of media language. A sophisticated, perceptive and accurate analysis of how sound is used in at least two examples. • Highly relevant response to the question, demonstrated by full focus on how the sound in the extract is used to create meaning. <p>Excellent responses in the top mark band will typically explore how meaning is created, including connotative effect(s), by at least two well-chosen examples described accurately using Media Studies terminology.</p> Level 2 (2–3 marks) <ul style="list-style-type: none"> • An adequate analysis of media language. A competent and generally accurate analysis of how sound is used in at least one example; responses may be descriptive in parts. • Partially relevant response to the question, demonstrated by some focus on how the sound in the extract is used to create meaning.

	<p>Adequate responses at the top of the middle mark band may successfully explore how meaning is created by one example and either lack a second relevant example or fail to establish how meaning is created in a second example. Responses at the bottom of this band may provide one or two examples of the use of sound with a poorly developed analysis of how meaning is created.</p> <p>Level 1 (1 mark)</p> <ul style="list-style-type: none">• A minimal analysis of media language.• Analysis of the use of media language (sound) to create meaning in the extract, if present, is minimal and/or largely descriptive and may not be relevant.• Barely relevant response to the question, lacking in focus on how the sound in the extract is used to create meaning. <p>Minimal responses in the bottom band may describe some aspect of sound in the extract but fail to establish how meaning is created or may be so short that neither example nor analysis is developed.</p> <p>Level 0 (0 marks) No response or no response worthy of credit.</p>

3* In this question you will be rewarded for drawing together elements from your full course of study, including different areas of the theoretical framework and media contexts.

How far does the extract try to create a sense that it is portraying 'real life'?

In your answer you should:

- analyse aspects of the extract giving detailed examples
- judge how far these aspects create a sense of watching 'real life'.

Assessment Objectives	AO2 - Analyse media products using the theoretical framework of media, including in relation to their contexts, to make judgements and draw conclusions. (Elements tested in this question: AO2(1a) Analyse media products using the theoretical framework of media including in relation to their contexts; AO2(1b) Make judgements and draw conclusions.) Maximum 15 marks	
Additional Guidance	The 'indicative content' is an example of valid content. Any other valid content is acceptable and should be credited in line with the levels of response. The 'indicative content' shown is not a full exemplar answer. It is not expected for candidates to cover all elements of the indicative content.	
Indicative content Media Language Responses may analyse the extract in terms of media language, for example: <ul style="list-style-type: none"> • the use of naturalistic locations, e.g. the shopping precinct, apparently natural lighting, and conventional costume reinforces a sense of realism • the use of continuity editing and conventional camerawork, e.g. shot reverse shot, does not draw attention to the artificiality of the extract • some more cinematic shots, e.g. the aerial shot of the car chase, might draw attention to themselves and detract from a sense of realism • some use of handheld camerawork, e.g. when the PCSO is threatened, suggests documentary realism • the use of the generic conventions of the police drama, e.g. the young rookie and old hand, fits audience expectations and does not undermine a sense of realism • any other relevant analysis. 	15 AO2 10x AO2(1a) 5x AO2(1b)	Use Levels of Response criteria. For this question there are two Levels of Response schemes. Award a mark out of ten for the first scheme and a mark out of five for the second. AO2(1a) Analyse media products using the theoretical framework of media, including in relation to their contexts. (total 10 marks) Level 3 (7–10 marks) An excellent application of the relevant elements of the theoretical framework and of relevant media contexts. <ul style="list-style-type: none"> • A sophisticated, perceptive and accurate analysis of relevant aspects of the extract supported by two or more detailed examples. <p><i>Responses that do not draw together knowledge and understanding from the full course of study including different areas of the theoretical framework and media contexts are limited to a maximum of 8 marks for AO2(1a).</i></p>

Media Representations

Responses may analyse the extract in terms of representation, for example:

- the use of stereotypes, e.g. the male criminal, enables instant interpretation and may appear more 'real'
- the use of deliberate anti-stereotypes, e.g. the female beat officer in a head scarf, may reinforce or undermine a sense of realism, depending on audience interpretation
- any other relevant analysis.

This question provides learners with the opportunity to draw together elements from their full course of study, including different areas of the theoretical framework and media contexts.

Media Industries

Responses may analyse the extract in terms of media industries, for example:

- the pre-watershed scheduling of the programme means that the extract minimises violence or swearing, which may undermine a sense of realism
- any other relevant analysis.

Media Audiences

Responses may analyse the extract in terms of media audiences, for example:

- the extract offers the audience entertainment and diversion, e.g. the visual spectacle of the robbery, and the opportunity to identify with a group of police officers, e.g. through entering their lunchtime banter – these mainstream uses and gratifications may enhance a sense of realism
- any other relevant analysis.

Media Contexts

Responses may analyse the extract in terms of media contexts, for example:

Level 2 (4–6 marks)

An adequate application of the relevant elements of the theoretical framework and of relevant media contexts.

- A competent, mostly accurate analysis of mostly relevant aspects of the extract supported by one or more detailed example; responses may be descriptive in parts.

Level 1 (1–3 marks)

A minimal application of the relevant elements of the theoretical framework and of relevant media contexts.

- Analysis, if present, of some aspects of the extract is minimal and/or largely descriptive and may not be relevant.

Level 0 (0 marks)

No response or no response worthy of credit.

AO2(1b) Make judgements and draw conclusions. (total 5 marks)**Level 3 (4–5 marks)**

A clear judgement and conclusion is reached and is fully supported by the analysis.

There is a well-developed line of reasoning which is clear and logically structured. The information presented is relevant and substantiated.

Excellent responses in the top mark band should make clear judgements and draw conclusions based on an understanding of how realism is constructed, providing judgements fully supported by the analysis. Responses do not have to conclude one way or the other – reward nuance in the answer.

<ul style="list-style-type: none"> • representation in the extract fits modern context of equality and diversity requirements by including gender equality, a gay police officer, and officers from ethnic minorities; this may reinforce or undermine a sense of realism, depending on audience interpretation • any other relevant analysis. <p>Extended response that makes judgements and draws conclusions Responses must make judgements and draw conclusions about how far the extract creates a sense of watching 'real life' using evidence and developing a line of reasoning. Responses might conclude that the extract does or does not create a sense that it is portraying 'reality' and are to be rewarded to the extent that they support this judgement through an analysis of relevant examples from the extract in a clear and logically structured line of reasoning.</p>	<p>Level 2 (2–3 marks) A partially clear judgement and conclusion is reached and is partially supported by the analysis. <i>There is a line of reasoning presented with some structure. The information presented is in the most-part relevant and supported by some evidence.</i></p> <p>Adequate responses in the middle mark band are more likely to make partially clear judgments and discuss the extent to which the extract is 'realistic', providing judgements partially supported by the analysis.</p> <p>Level 1 (1 mark) An attempt to reach a judgement and a conclusion, partially supported by some analysis. <i>The information is basic and communicated in an unstructured way. The information is supported by limited evidence and the relationship to the evidence may not be clear.</i></p> <p>Minimal responses in the lower mark band may offer personal opinion supported by descriptive reference to the extract.</p> <p>Level 0 (0 marks) No response or no response worthy of credit.</p>

- 9 Analyse how genre codes have been used in *The Lego Movie* poster campaign to appeal to a family audience.

In your answer you must also refer to relevant media contexts.

Assessment Objectives	AO2 - Analyse media products using the theoretical framework of media, including in relation to their contexts. (Elements tested in this question: AO2(1a) Analyse media products using the theoretical framework of media including in relation to their contexts) Maximum 10 marks	
Additional Guidance	The 'indicative content' is an example of valid content. Any other valid content is acceptable and should be credited in line with the levels of response. The 'indicative content' shown is not a full exemplar answer. It is not expected for candidates to cover all elements of the indicative content. Reward is given for analysis of gender stereotypes with reference only to the poster campaign, not any representations which may have been constructed by the film.	
Indicative content Responses should analyse how genre codes have been used in The Lego Movie poster campaign to appeal to a family audience such as: <ul style="list-style-type: none"> • The setting of the main poster with an implied threat of destruction of a large 'metropolis' is instantly recognisable to a large family audience and quickly provides genre information signifying the action based nature of the film. • The posters feature genre hybridity to engage a large family audience, mixing both action and superhero genres by using the culturally familiar superhero characters' (Batman, Superman, Wonder Woman and the Green Lantern) typical iconography in a fashion that a range of ages will have grown up with and appreciated. • The action signified on the main poster, for example, explosions, oversized villainous characters, flying cars, helicopters and superheroes is in some ways typical of a superhero / action movie, but it also subverts the genre with superheroes running from danger with an unknown protagonist centre stage. This creates intrigue and enigma and a hook for a family audience to watch the movie. 	10 AO2 10xAO2(1a)	NB: Film is an inextricable part of the wider landscape, which is intimately connected with other media, such as video games. However, film should not be a primary object of study in this context. Therefore aspects of responses that rely solely upon knowledge of <i>The Lego Movie Film</i> should not be credited. Use Levels of Response criteria Level 3 (7–10 marks) An excellent analysis of media representations. <ul style="list-style-type: none"> • A sophisticated, perceptive and accurate analysis of how genre codes have been used in The Lego Movie poster campaign to appeal to a family audience • Detailed, accurate and relevant reference to media contexts • Highly relevant response to the question, demonstrated by full focus on genre codes. Excellent responses in the top mark band will typically analyse two or more uses of genre codes and conventions in relation to reaching a family audience with detailed reference to the poster campaign and detailed reference to media contexts.

<ul style="list-style-type: none"> The tagline on the main poster 'The story of a nobody who saved everybody' also creates intrigue and enigma and sets up generic expectations for the audience that this will be a movie with a theme of 'an underdog overcoming the odds' which is popular and accessible to a large family audience. The star performers' names on the character posters have been made prominent to attract a wide-ranging audience and appeal to fans of each of the star performers. The character posters also feature a range of character types, for example, Lord Business is clearly villainous and tightly framed in close-up to show his anger or rage, whereas Wyldstyle's close-up suggests a more casually heroic status. The close-up also reveals the choice of complimentary colours on her jacket, lipstick and hair which are likely to be appeal to the younger female aspect of a family audience. This implies the different character types have been chosen by media producers to appeal to an inclusive, large family audience. <p>Responses should discuss the media contexts for these genre codes, such as:</p> <ul style="list-style-type: none"> the globalisation of media industries, especially the film industry leads to extensive use of familiar genre codes to enable instant interpretation by a global family audience the contemporary post-feminist context – reflected in Hollywood family film advertising and marketing – appeals to global, modern, inclusive families and society the importance of genre hybridity and the merging of film franchises (the DC superheroes and Lego) to reach ever larger audiences. 		<p>Level 2 (4–6 marks) An adequate analysis of media representations.</p> <ul style="list-style-type: none"> A competent and generally accurate analysis of how genre codes have been used in The Lego Movie poster campaign to appeal to a family audience; responses may be descriptive in parts Some reference to media contexts, which are generally accurate and partially relevant Partially relevant response to the question, demonstrated by some focus on genre codes. <p>Adequate responses at the top of the middle mark band may analyse at least two uses of genre codes and conventions in relation to reaching a family audience, though one explanation may be less developed, and there will be some reference to media contexts. Responses at the bottom of this band may be descriptive at times but will analyse at least one use of genre code and convention in relation to reaching a family audience and reference to media contexts may be very underdeveloped.</p> <p>Level 1 (1–3 marks) A minimal analysis of media representations.</p> <ul style="list-style-type: none"> Analysis, if present, of how genre codes have been used in The Lego Movie poster campaign to appeal to a family audience is minimal and/or largely descriptive and may not be relevant Little or no reference to media contexts, accuracy and relevance are likely to be lacking Barely relevant response to the question, lacking in focus on genre codes. <p>Minimal responses in the bottom band may describe some aspect of genre codes and conventions but this may be descriptive with little or no reference to how they have been used to reach a family or audience. There will also be little or no reference to media contexts.</p>
